

Central State Hospital

Excellence in Evaluation, Treatment, Protection & Disposition

Information Technology Specialist I Programmer

Central State Hospital has a unique opportunity for an individual with an interest and experience in computer programming and system design to join our staff as an Information Technology Specialist I. This position will receive direction from other Sr. Programming staff, but overall guidance from the Department Manager. This position will provide support and development of client/server and web based healthcare related, application systems. This will include interfacing with a programming team and end users to develop and implement system requirements, systems analysis, and system design studies. Projects vary in nature, design, and complexity and require communication with all levels of facility staff.

This position requires demonstrated work experience using the Visual Studio .NET Suite and design experience with Microsoft SQL Server 2000, and report development experience with Crystal Reports 9.0 or higher. Applicants should possess a strong level of knowledge and experience in using object oriented programming methodologies. Development experience with ASP .Net would be a plus. Applicants must possess a strong team ethic, a willingness to learn, and the ability to take system specifications and requirements from Sr. level programming staff for the development of systems. Associate Degree related to Information Technology or combination of equivalent education and experience is strongly preferred.

An extensive criminal history background investigation and employment references will be conducted. Announcement # 0214A5; Pay Band 4 - hiring range (\$28,143 to \$44,000). This position will remain open for a minimum of five workdays or until positions are filled. Resumes may accompany but will not substitute for a completed State Application Form (DHRM 10-012).
